

Notice of Decision

Mr Darren Turner
Jackson Design Associates
Latimer House
Latimer Way
Sherwood Energy Village,
Ollerton,
NG22 9QW

Town and Country Planning Act 1990 (as amended)

Application for:	Outline Planning Permission Major
Application No:	18/01898/OUTM
Applicant:	Mr Richard Gombos
Agent:	Mr Darren Turner
Proposal:	Outline application with all matters reserved for residential development of up to 10 new dwellings including the demolition of the former Red House Farm
Site Address:	Site Of Red House Farm Newark Road Ollerton Nottinghamshire NG22 9PZ

Newark and Sherwood District Council as Local Planning Authority in pursuance of their powers under the said legislation **Grant Outline Planning Permission Major** for the development described in the above application, subject to the following conditions.

Conditions:

01

Applications for approval of reserved matters shall be made to the local planning authority not later than three years from the date of this permission.

The development hereby permitted shall begin not later than two years from the date of approval of the last of the reserved matters to be approved.

Reason:

To comply with the requirements of Section 51 of the Planning and Compulsory Purchase Act 2004.

02

Details of the access, appearance, landscaping, layout and scale ('the reserved matters') shall be submitted to and approved in writing by the local planning authority before development begins and the development shall be carried out as approved.

Reason:

This is a planning permission in outline only and the information required is necessary for the consideration of the ultimate detailed proposal.

03

Any details submitted in relation to reserved matters for landscaping shall include a schedule (including planting plans and written specifications, cultivation and other operations associated with plant and grass establishment) of trees, shrubs and other plants, noting species, plant sizes, proposed numbers and densities. The scheme shall be designed so as to enhance the nature conservation value of the site, including the use of locally native plant species and shall include details of a management plan.

Reason:

In order to ensure the landscaping of the site promotes biodiversity on the site in accordance with the aims of Core Policy 12 of the Newark and Sherwood Core Strategy (2019).

04

The development hereby permitted authorises the erection of no more than 10 dwellings.

Reason:

To define the planning permission.

05

No part of the development hereby approved shall commence until a detailed surface water drainage scheme based on the principles set forward by the approved KSA Drainage Strategy ref 5081/DS01 dated April 2019 rev P3, has been submitted to and approved in writing by the Local Planning Authority in consultation with the Lead Local Flood Authority. The scheme shall be implemented in accordance with the approved details prior to completion of the development. The scheme to be submitted shall:

- Demonstrate that the development will use SuDS throughout the site as a primary means of surface water management and that design is in accordance with CIRIA C753.
- Limit the discharge rate generated by all rainfall events up to the 100 year plus 40% (for climate change) critical rain storm 5 l/s rates for the developable area.
- Provision of surface water run-off attenuation storage in accordance with 'Science Report SCO30219 Rainfall Management for Developments' and the approved FRA
- Provide detailed design (plans, network details and calculations) in support of any surface water drainage scheme, including details on any attenuation system, and the outfall arrangements. Calculations should demonstrate the performance of the designed system for a range of return periods and storm durations inclusive of the 1 in 1 year, 1 in 2 year, 1 in 30 year, 1 in 100 year and 1 in 100 year plus climate change return periods.
- For all exceedance to be contained within the site boundary without flooding new properties in a 100year+40% storm.
- Details of STW approval for connections to existing network and any adoption of site drainage infrastructure.
- Evidence of how the on-site surface water drainage systems shall be maintained and managed after completion and for the lifetime of the development to ensure long term

Reason:

A detailed surface water management plan is required to ensure that the development is in accordance with NPPF and local planning policies. It should be ensured that all major developments have sufficient surface water management, are not at increased risk of flooding and do not increase flood risk off-site.

06

Before the development is commenced, details of bat boxes and bird nest boxes to be placed on either retained trees or new housing on the perimeters near to hedge/tree lines and a timetable of implementation shall be submitted to and approved in writing by the District Council. Once approved the bat boxes and bird nest boxes shall be erected in accordance with the approved details.

Reason:

In order to enhance habitats on the site in accordance with the aims of Paragraph 118 of the National Planning Policy Framework (2019).

07

Details submitted pursuant to the first application for approval of reserved matters consent shall include a draft information leaflet to be distributed to all new residents within the development regarding the ecological value of the local area and the sensitivities of woodlark and nightjar, requesting that dog walking after dusk, during the breeding season within the key areas for nightjar, is avoided. Once approved by the local planning authority in consultation with the Nottinghamshire Wildlife Trust, the information leaflet shall form part of the 'welcome pack' to be distributed by the developer of the site to first occupants following legal completion.

Reason:

In order to protect biodiversity in the District in accordance with the aims of Core Policy 12 of the Newark and Sherwood Core Strategy (2019).

08

The development hereby approved shall be carried out in accordance with Appendix 1 of the Protected Species Survey undertaken by C.B.E Consulting dated 31st August 2018 in respect to the procedure to follow if bats are unexpectedly discovered during works to the existing building.

Reason:

In order to protect biodiversity in the District in accordance with the aims of Core Policy 12 of the Newark and Sherwood Core Strategy (2019).

09

The building which exists on site shall not be demolished and no hedge or tree that is to be removed as part of the development hereby permitted shall be lopped, topped, felled or otherwise removed during the bird nesting period (beginning of March to end of August inclusive) unless otherwise agreed in writing by the local planning authority.

Reason:

To ensure that adequate provision is made for the protection of nesting birds on site.

010

Any reserved matters submission in relation to securing details of the access to the development hereby approved shall be accompanied by details to show the provision of suitable visibility splays in accordance with actual vehicle speeds along Newark Road, parking and turning facilities, access width, gradient, surfacing, and drainage. All details submitted to the Local Planning Authority for approval shall comply with the current Highway Design Guide and shall be implemented as approved.

Reason:

To ensure the development is constructed to adoptable standards.

011

Unless otherwise agreed by the Local Planning Authority, development other than that required to be carried out as part of an approved scheme of remediation must not commence until Parts A to D of this condition have been complied with. If unexpected contamination is found after development has begun, development must be halted on that part of the site affected by the unexpected contamination to the extent specified by the Local Planning Authority in writing until Part D has been complied with in relation to that contamination.

Part A: Site Characterisation

An investigation and risk assessment, in addition to any assessment provided with the planning application, must be completed in accordance with a scheme to assess the nature and extent of any contamination on the site, whether or not it originates on the site. The contents of the scheme are subject to the approval in writing of the Local Planning Authority. The investigation and risk assessment must be undertaken by competent persons and a written report of the findings must be produced. The written report is subject to the approval in writing of the Local Planning Authority. The report of the findings must include:

- (i) a survey of the extent, scale and nature of contamination;
- (ii) an assessment of the potential risks to:
 - human health;
 - property (existing or proposed) including buildings, crops, livestock, pets, woodland and service lines and pipes;
 - adjoining land;
 - ground waters and surface waters;
 - ecological systems;
 - archaeological sites and ancient monuments;
- (iii) an appraisal of remedial options, and proposal of the preferred option(s).

This must be conducted in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11'.

Part B: Submission of Remediation Scheme

A detailed remediation scheme to bring the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property and the natural and historical environment must be prepared, and is subject to the approval in writing of the Local Planning Authority. The scheme must include all works to be undertaken, proposed remediation objectives and remediation criteria, timetable of works and site management procedures. The scheme must ensure that the site will not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

Part C: Implementation of Approved Remediation Scheme

The approved remediation scheme must be carried out in accordance with its terms prior to the commencement of development other than that required to carry out remediation, unless otherwise agreed in writing by the Local Planning Authority. The Local Planning Authority must be given two weeks written notification of commencement of the remediation scheme works.

Following completion of measures identified in the approved remediation scheme, a verification report (referred to in PPS23 as a validation report) that demonstrates the effectiveness of the remediation carried out must be produced, and is subject to the approval in writing of the Local Planning Authority.

Part D: Reporting of Unexpected Contamination

In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported in writing immediately to the Local Planning Authority. An investigation and risk assessment must be undertaken in accordance with the requirements of Part A, and where remediation is necessary a remediation scheme must be prepared in accordance with the requirements of Part B, which is subject to the approval in writing of the Local Planning Authority.

Following completion of measures identified in the approved remediation scheme a verification report must be prepared, which is subject to the approval in writing of the Local Planning Authority in accordance with Part C.

Reason:

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors.

Note to Applicant

01

You are advised to consider whether there are opportunities to incorporate innovative boundary measures to restrict public access and cat access to the areas important for woodlark and nightjar when submitting details relating to the reserved matters.

02

The applicant is advised that all planning permissions granted on or after the 1st December 2011 may be subject to the Community Infrastructure Levy (CIL). Full details of CIL are available on the Council's website at www.newark-sherwooddc.gov.uk/cil/

The proposed development has been assessed and it is the Council's view that CIL is not payable on the development hereby approved as the development type proposed is zero rated in this location.

03

This application has been the subject of discussions during the application process to ensure that the proposal is acceptable. The District Planning Authority has accordingly worked positively and pro-actively, seeking solutions to problems arising in coming to its decision. This is fully in accordance with Town and Country Planning (Development Management Procedure) Order 2010 (as amended).

04

NCC Flood Team wish for the following comments to be included as an informative:

We ask to be re-consulted with any changes to the submitted and approved details of any FRA or Drainage Strategy which has been provided. Any deviation from the principles agreed in the approved documents may lead to us objecting to the discharge of conditions. We will provide you with bespoke comments within 21 days of receiving a formal consultation.

A copy of the decision notice and the officer/committee report are available to view on the Council's website.

Authorised Officer on behalf of Planning Development, Newark and Sherwood District Council

Date: 31 January 2020

Note: Attention is drawn to the attached notes.

Important note:

This permission refers only to that required under the town and country planning acts and does not include any consent or approval under any other enactment, byelaw, order or regulation, including the passing of plans for the purpose of the building regulations which requires additional approval and a separate application must be submitted.

Approval of details (Reserved Matters): Applicants who receive an approval of details, known as “reserved matters”, under previous outline permission are reminded of the requirements as to commencement of the development within the time specified in the conditions attached to the outline permission and to ensure that any other conditions attached to that outline permission are complied with.

Discharge of Conditions: Please note the Discharge of Condition incurs a nationally set fee and the service normally has 8 weeks to respond to each request from date of receipt. Further details are available on our website at:

www.newark-sherwooddc.gov.uk/planning/whathappensafterpermissionisdecided/

Appeals to the Secretary of State: If you disagree with the decision of the Local Planning Authority to grant it subject to conditions, then you can appeal to the Planning Inspectorate. It is important to note that there are different time periods in which you can appeal from the date of this notice. Please note, if you seek an inquiry you are asked to give the Planning Inspectorate and local planning authority at least 10 days’ notice that you intend to submit an inquiry appeal. Further information is available on the Planning Inspectorates website at www.gov.uk/appeal-planning-inspectorate or contact their customer support team by telephone 0303 444 5000 or email enquiries@planninginspectorate.gov.uk

Minor Amendments (not applicable to Listed Building Consent): If you wish to make alterations to a scheme after it has been granted planning approval, some minor changes to approved plans can be dealt with under an amended plan procedure. If this is an option you wish to pursue, the relevant application forms entitled “Application for a non-material amendment following a grant of planning permission” should be completed and returned to us along with scaled plans showing the proposed amendments and a fee. You can submit (and view guidance) your applications online or alternatively, please telephone our Customer Services on 01636 650000 who can arrange for a set to be posted to you.

We will in most cases accept the following as minor amendments to previously approved plans:

- Reduction in the volume/size of the building/extension
- Reduction in the height of the building/extension
- Amendments to windows/doors/openings that will not have any impact on neighbouring properties

However, this advice is given on an informal basis only and is therefore not binding on any future recommendation, which may be made to the Council or any formal decision by the Council. We consider the following to normally take a development beyond the scope of the permission and will therefore require a fresh application to be submitted:

- Significant increase in the volume of the building/extension
- Significant increase in the height of the building/extension
- Changes which would conflict with a condition on the original approval
- Additional and/or repositioned windows/doors/openings that will have an impact on neighbouring properties
- Changes which would alter the description of development from the original application
- Amendments that would warrant re-consultation either of neighbours, council departments or statutory bodies

Further details are available on our website at:

www.newark-sherwooddc.gov.uk/planning/whathappensafterpermissionisdecided/

Disposal of any building waste: If you are having any building or remedial work done on your home or constructing a new dwelling, you have a 'Duty of Care' to ensure your waste is disposed of properly. Any contractor you employ or even if you arrange to have any construction or demolition waste removed yourself, the person you give it to must be a registered waste carrier. You should ask to see their Waste Carriers Licence and obtain a receipt for any waste which is removed. To ensure they are registered, you can also check with the Environment Agency online or by telephoning 08708 506506.

Help to keep our District a cleaner and less polluted place.
